Calculating Resident/Commuter status

To accommodate those students/schools who wish to commute to the JACC state convention and not stay in the hotel the JACC executive board has established a commuter fee that will also help individuals pay their share of facility rental fees that will accrue. Commuter fees are \$275 per delegate. Non-commuter or resident fees remain at \$225 per delegate.

The resident fees or non-commuter rates were determined based on the assumption that there are four delegates to a room and you stay 3 nights.

First you need to calculate the number of room nights by multiplying the number of hotel rooms x the number of nights. Example: 6 hotel rooms x 3 nights = 18 room nights

Next, to calculate how many delegates are commuters and/or residents please refer to the following formula:

room nights x 4/3 = # of residents rounded to nearest whole number

[#of total delegates - # of residents = # of commuters]

Example: If Palomar is using 6 room nights this would be the way they would utilize this formula: 6 x 4/3 = 8 resident delegates. So Palomar would be able to bring 8 students at the \$225 rate and any students over 8 would be charged at the \$275 rate.

Resident/Non-Commuter Chart

3 room nights = 4 resident delegates

4 room nights = 5 resident delegates

5 room nights = 7 resident delegates

6 room nights = 8 resident delegates

- 7 room nights = 9 resident delegates
- 8 room nights = 11 resident delegates
- 9 room nights = 12 resident delegates
- 10 room nights = 13 resident delegates
- 11 room nights = 15 resident delegates
- 12 room nights = 16 resident delegates
- 13 room nights = 17 resident delegates
- 14 room nights = 19 resident delegates
- 15 room nights = 20 resident delegates
- 16 room nights = 21 resident delegates
- 17 room nights = 23 resident delegates
- 18 room nights = 24 resident delegates
- 19 room nights = 25 resident delegates
- 20 room nights = 27 resident delegates
- 21 room nights = 28 resident delegates
